

Verify identities, detect fraud. Instantly.

Youverse is on a mission to free people from bureaucracy while empowering them to own their data. We remove passwords, long verification processes, and unnecessary risks, and give companies what they need most: security, seamless experience, and total privacy.

Why decentralization matters

Storing biometrics is a liability whether on local devices or central services. Youverse combines the best of both worlds:

No usable biometric data ever stored.
Fully compliant with GDPR, PSD2, and FIDO.
Identity verification without holding personal data.

Youverse is trusted by banks, fintechs, gaming operators, and hospitality providers to:

- **Accelerate digital onboarding.**
- **Prevent fraud** with robust synthetic fraud detectors.
- **Meet compliance requirements** without compromising user experience.
- **Reduce drop-off rates** and increase completed registrations.

7x faster matching
than traditional providers.

True identity
Ties identity to account ownership.

Private
No central biometric storage.

Deploy anywhere
Mobile native and web SDK.

NIST-certified top-tier
1 in 1M FAR for 0.4% FRR.

Certified for liveness
iBeta ISO 30107 certification.
